

SELECTED HEADLINES GREEN HYDROGEN

TEXT	RETWEETS
The world is on the brink of what may turn out to be its most important energy experiment. Green hydrogen could be our salvation from devastating climate change, or a very expensive mistake https://t.co/zhUqnPHNkU	265
More #GreenInnovation that benefits ALL 20 years anticipating the energy transition, now with #GreenHydrogen. A pioneering commitment to leading the energy of the future today? https://t.co/q1VD1Q4jat	60
It was a pleasure hosting @AusHCIndia today. I was energised to discuss India's efforts in the climate agenda & specifically Adani Group's commitment to energy transition. As leaders in solar power, we continue pioneering the shift towards alternate fuels (green hydrogen, etc.) https://t.co/cgKITEBZlq	57
Betting on green hydrogen, Airbus gives itself 5 years to develop a plane that doesn't pollute the sky Watch the most important transition this industry has ever seen happen faster than we think, unleashing the sector from the shackles of oil & gas https://t.co/qhF98R6qZb	55
?Esta semana nos hemos puesto al dia con el #HidrogenoVerde En este enlace puedes acceder al contenido completo de la jornada que celebramos https://t.co/8PVLbHRcix Te resumimos algunas de las ideas en este video https://t.co/0SGf2huvY2	46
Wow, an 1,800 person + vehicle ferry for @DFDSGroup's Oslo-Copenhagen route, powered by green hydrogen, ready in 2027! To be powered by a 23 MW fuel cell. https://t.co/ooKwdLqtqdm https://t.co/9lolpjtfdv	45
World's #4 iron ore producer moves to produce more energy than Chevron by developing 235GW of solar and wind, 4 times US's total solar generation capacity, and moving into green hydrogen It's the single most aggressive push into renewables ever unveiled https://t.co/V942WncISu https://t.co/0F7PkOALnA	43
'Green Hydrogen Catapult'. Y el PSOE les dara cientos de millones de dinero publico para el juguete, como hicieron en su dia con las renovables cuya factura aun estamos pagando. Pero tu, autonomo arruinado, no te olvides de que este mes te subieron la cuota. https://t.co/vCnUDtFSjD	38
The @NorthH2-project is Europe's biggest green hydrogen project, and we are now part of it. The project aims to produce green hydrogen using renewable electricity from offshore wind off the coast of Netherlands #Together #H2 #energytransition	33
#Hydrogen can play a pivotal role in decarbonising hard to electrify sectors, but it must be #GreenHydrogen - hydrogen produced from #renewableenergy - to help the world meet global #climategoals ? https://t.co/4HIge0RBuX #RecoverBetter https://t.co/uN3swMscYE	32
Green hydrogen is still barely more than a cottage industry. The biggest producer of electrolyzers, Norway's Nel ASA, can make 80 megawatts per year. To put the world on a path to zero emissions, we'll need to install two million megawatts or more https://t.co/51akmizNFW https://t.co/Q7qKHYyDqU	31
#FutureOfMobility: @Airbus says it could be flying zero-emissions planes by 2035 #hydrogen #airplanes [video @wef] Interested in #GreenHydrogen? Please join the LinkedIn " HYDROGEN NEWS" group: https://t.co/fzVS9nu8B7 https://t.co/f08fWbIC2o	30
